Activated Curcumin

- ◆ Powerful source of over 200 antioxidant/anti-inflammatory compounds found in turmeric
- ◆ Unrivaled, superior bioavailability and absorption

Who Needs Activated Curcumin?

Those suffering with musculoskeletal pain & inflammatory conditions such as rheumatoid and osteoarthritis will benefit most.

The anti-inflammatory action of curcumin alone matches those of prescription drugs in clinical trials, and it is only one of over 200 nutritional compounds found in turmeric.

The curcuminoids found in turmeric have also demonstrated anti-cancer activity, improved insulin activity, as well as lowering the oxidative damage caused by Alzheimer's disease.

The long list of benefits of curcumin does not stop there. Research has revealed anti-aging properties and reduction in the symptoms of depression, similar to that of Prozac.^{1,2}

Ingredients:

500 mg Curcuma longa (emulsified) (root & extract)
20 mcg Superoxide Dismutase
(Plant source antioxidant)
20mcg Catalase
(Plant source antioxidant)

Superior Absorption

The biggest issue most curcumin supplements face is delivering a product that can be absorbed well by the body. **Activated Curcumin** is formulated utilizing a process that effectively emulsifies turmeric's many beneficial compounds, not just curcumin, into a bioavailable form that won't damage the membranes in the digestive tract. This is what sets Activated Curcumin apart from other turmeric supplements.

Dosing: 2 capsules once daily
