OmegaRx

- ◆ Strong dose of 1000mg pure Omega-3 fatty acids with superior bioavailability & absorption
- ◆ Useful for inflammation, high blood pressure, cognitive decline, heart health, and more

What is OmegaRx?

OmegaRx is a strong dose of omega-3 fatty acids cleanly sourced and free of shellfish. These essential fatty acids are necessary for cerebral functioning and neurological development. Each capsule delivers an impressive 1.3 grams of omega-3's, including of 570 mg of EPA and 430 mg DHA, in the most bioavailable form appropriate for therapeutic dosing. The freshest raw material, unparalleled purity, full traceability, and therapeutic potency are key for these important fatty acids to be absorbed.

Who needs OmegaRx?

OmegaRx is indicated for those who experience inflammatory conditions, have hypertension, or are experiencing cognitive decline and/or memory problems. This product is also wonderful for supporting heart health, immune functioning, and cell integrity. Research also indicates Omega-3's may reduce tumor formation.

The Role of EPA & DHA

EPA is necessary for production of eicosanoids substances that are responsible for regulating blood pressure and viscosity. EPA supports neurological, emotional, cell membrane, and heart health, and supports a healthy immune system and inflammatory response. DHA plays a role in eye health, brain development, and memory.

Certified for Purity and Traceability

ORIVO is a laboratory company in Norway that provides verification of the marine ingredients of our fish oils. ORIVO assures the authenticity of the marine ingredients found in all of our fish oil products.

We guarantee this product is:

- Made from anchovy
- Sourced from a sustainable fishery off the coast of South America

Superior Bioavailability

The natural triglyceride form of these omega-3's is more efficiently digested and allows for 70% greater absorption & bioavailability than the ethyl ester form.

Dosing: 1 capsule three times a day with meals
